To whom it may concern

Dear Mr./Ms./Dr.,

About Me

I am an economist with experience in quantitative investigation at the Universidad del Valle's Research Seedling ANIF (Analítica e Ingeniería Financiera). I excel in data analysis (R, Python), report writing, and academic support in micro-macroeconomics and econometrics. I am proactive, communicative, with a keen attention to detail and excellent team-work skills. My areas of interest are Industrial Organization, Process Engineering, Quantitative Finance and Agro-Industry.

Why Me?

I am, at my core, a responsible person who is deeply committed to my work and passionate about my profession. I have not only mastered technical skills relevant to my field—such as international trade, finance, micro and macroeconomics, Excel, and other software tools—but I have also strengthened my empathy, creativity, and teamwork abilities. I have a strong grasp of current market realities, and I complement this insight by tailoring my knowledge to the specific needs of companies and by upholding ethical standards and a collaborative approach.

Sincerely,

Danilo Álvarez Jiménez
